*Where **Elegance, Security** Modern Design Meet*

Designed for contemporary living spaces where architectural aesthetics take center stage, our aluminum entrance doors bring together luxury, modern lines, and advanced security. This exclusive collection embodies both elegance and durability in every detail offering not just a door, but a design element that adds value to your property.

With a variety of surface finishes, minimalist details, and integration with cutting-edge technology, these doors provide ideal solutions for those seeking both style and functionality. Whether complementing a classic or modern architectural style, each model creates a powerful first impression that reflects prestige and quality.

*A Graceful detail
where **history** meets **aesthetics**...*

The unique pattern that inspired our door design originates from the Eastern Dome, located in the Harakan region of Iran and built in 1067. This geometric motif, dating back to the Seljuk era, carries both architectural heritage and perfect symmetry into the present through its octagonal form and star-shaped composition.

With its intricate yet balanced structure, the motif has been elegantly integrated into our door. In doing so, it adds a historical touch that brings depth and meaning to modern spaces.

Reflecting the aesthetic understanding of nearly a thousand years ago, this design merges with clean lines to offer timeless elegance to your space. This special design, which unites architecture and art, stands as a tribute to cultural heritage.

COLOR CHART

Powder Coating

BELLAGIO	CERNOBBIO	CREMIA	GARDA	VARENNA	TENNO
GARGNANO	MENAGGIO	NAGO	RIVA	TREMOSINE	TREMEZZO
MENZINO	PILZONE	COVELO	SARNICO	SENSOLE	VELLO
CARZANO	ISEO	MARONE	TOLINE	PRESSO	PARADISO

In our powder coating series, we have used different technologies to create two levels of outdoor durability: Qualicoat 1 and Qualicoat 2, with a variety of colors in different effects. These colors meet all internationally recognized architectural coating standards such as AAMA, Qualicoat, and GSB, providing excellent indoor and outdoor durability at various resistance levels to meet specific needs.

Standard Color

ATLAS	GRIANTE	ARGENT	HAZEL	NOTTE
-------	---------	--------	-------	-------

There may be differences in tone between the colors shown in the catalog and the actual colors. Please make sure you see the **original color sample**.

ALUMI
in every

ALUMINIUM SHADE of style.

Nano Anodizing

Nano anodized colors are designed for anodizing architectural metal components such as window and door frames, facade systems, sunshades, railings, and all types of aluminum sheets. Additionally, they can be used for anodizing any kind of industrial aluminum surfaces. This anodizing process has been developed by an Italian company, which has conducted and certified all necessary surface durability tests. Notably, its high UV resistance allows it to be used outdoors under all climatic conditions.

Special Effect

Wood-look decorative and modern solutions, used in door and window systems, home and office furniture, and the white goods industry, are among the most sought-after materials in the world of decoration. They can be safely used for many years on all types of metal, glass, and heat-resistant plastic surfaces, offering a wide range of durable, natural, and long-lasting color and pattern options.
