

- **Expands Living Spaces:**
The Skyroof Winter Garden System seamlessly extends indoor living areas, bringing the beauty and comfort of the outdoors into the home.
- **Versatile Application Solution:**
An ideal system for carports, terraces, patios, and various shading applications, offering both functionality and aesthetic appeal.
- **Polycarbonate and Glass Compatibility:**
The Skyroof system is designed to accommodate both polycarbonate and glass roofing options, providing flexibility for different project requirements.
- **Wide-Span Structural Capability:**
Allows clear spans of up to **5 meters** between support columns, maximizing usable space and minimizing visual obstruction.
- **Self-Supporting Structure:**
Depending on structural calculations, the system can achieve heights of up to **3500 mm** without requiring additional steel reinforcement.
