

A thermally insulated, **inward-opening aluminium** window system with a **concealed sash**, designed to meet the **aesthetic expectations of modern architecture.**

TECHNICAL SPECIFICATIONS

85,8 mm	SASH WIDTH
55,4 mm	FRAME TO SASH HEIGHT
85 mm	FRAME WIDTH
25-28 mm	GLAZING THICKNESS
34 mm	THERMAL BARRIER
120-200 kg	MAX. SASH WEIGHT CAPACITY

(UW) 1,10 W/m²K

SYSTEM FEATURES

- 
- ✓ **Concealed Sash** Design
 - ✓ **Thermal** Insulation
 - ✓ **Inward-Opening Window** System
 - ✓ **Reliable Hardware** Solutions

Minimal and Seamless Design

The concealed sash and slim profile geometry create a clean, minimalist and seamless façade appearance.

Enhanced Weathertightness

The adjustable locking hardware provides improved resistance to air and water infiltration while enhancing acoustic insulation.

Minimized sash profile visibility creates a clean, uniform and visually seamless façade appearance.
